Sam Bowditch

Software Engineer

Rio de Janeiro | +55 (21) 97516 5226 | https://www.linkedin.com/in/sam-bowditch-b777032bb | https://portfoliosbow19.netlify.app/

PROFILE

Passionate and reliable engineer that has demonstrated deep curiosity, a strong ability to learn, and a team-first mentality. Takes ownership of features end-to-end and routinely catches structural and architectural issues, as well as edge cases missed by others. Driven to produce genuine value with a long-term view of cost and maintainability.

EMPLOYMENT HISTORY

Fullstack Software Engineer

Aug 2025 - current

Olly Olly Inc (USA)

Hands-on design and implementation of reliable multi-platform fullstack systems comprising of Supabase, Flutter, Google Cloud Run Functions. Taking ownership of AI-driven systems via holistic consideration of the system, responsible usage, and careful review and manual testing. Advocate for system health and quality at all stages of development lifecycle. Keen focus on effective communication across all stakeholder layers, with a focus on expectation management and realistic goal setting.

React Developer

Dec 2024 - Feb 2025

Tulfa Inc (USA)

Worked closely with CEO and UX/Design team to implement a cross-platform, performant, media-heavy portfolio page. Leveraged Next.js, Framer Motion, Figma, and other standard frontend technologies to meet targets.

Career Break

Aug 2023 - Dec 2024

After developing a passion for building personal small data-driven intelligence tools at Grant Thornton, I focussed on training on standard web technologies (JavaScript, React, SQLite/MySQL). Some personal projects designed and built include a Chrome extension for webpage scraping and a mobile and Chrome vocabulary tracking application.

Corporate Intelligence Analyst

Feb 2021 - Aug 2023

Grant Thornton UK LLP

Conducted small to medium scale desktop asset tracing investigations with broad suite of data tooling. Supported large, cross-border asset tracing projects by delivering research documents to senior/executive stakeholders. Quickly adapted to run small scale projects without supervision, with significant trust developed with managers. Learned Python and developed several personal data-driven tools to boost team productivity.

EDUCATION

Law with another Legal System (UK)

2015 - 2019

University College London (UCL)

Achieved 2:1 (64% average), with strong grades (top 20% in class) in Commercial Law (70), Private International Law (73), and Property Law (70)

SKILLS

Project Planning | Written communication | Debugging | Teamwork | Attention to detail
